

# MARUTI GRANITE &

## GM GRANITE

**Why Granite:-** Granite is a magnificent material, which is durable and glossy. Having lot of colours. It is also one of the oldest stone, which is being used as a strong flooring material and it gives your floors a magnificent grandeur to home and office. It is resistant to scratches, acids, stains and heat. It is long lasting, durable and available in a wide variety of colours, textures and unique crystal patterns that create an inviting environment for you. You can install granite in office, home, porch, parking, swimming pool and also we can use as countertop, kitchen working self with different types of finishing over it. This is important that the granite should have less variation in patterns to make it beautiful. More variation in the pattern makes the flooring very ugly. We have sorted out the best granite for flooring, by measuring the availability, uniformity, and prices. The greatest difference between granite and other stones lies in their porosity, softness and durability.

**Granite stone** become very popular in **Flooring** and wall dado due to its hardness quality, ability to take good polish and wide variety of colours available in it. Granite is obtained from intrusive igneous rock which comprise quartz, alkali feldspar and this common type of rock and have granular texture. In general granite is available in white, pink, grey, and yellow and black in colour. It is used from long time ago is very durable and shining texture remains for long time and its cleaning is very easy. Granite stone is hard and tough stone with an average density range from 2.5 to 2.7 g / cubic centimetre. Granite has high melting temperature not less than 1200 centigrade and has good compressive strength.

**Flooring** lets your feet walk on it comfortably as well as add to the beauty of the home. Flooring also reflects your lifestyle and traits. So don't go blindfolded for choosing the flooring.

**Labor guide line for laying granite ---** For other stones we do all finishing works after laying but in case of Granite just layout flooring and just after 5 days we can use it. The base concrete should be leveled cleaned, wetted and mopped before the process of laying granite floor should be started. The level should be checked from the level mark/ thread level which is marked on wall. On base coat lay 20 mm thick cement coarse sand mortar 1:3 ratio for fixing granite stone. Granite stone is laid on the mortar bedding, pressed, tapped with wooden mallet and brought to the level with adjoining slab. Subsequent slab are laid in the same manner. After each slab lay, surplus cement grout that may have come out of the joints shall be cleared off.

(A) *No any partner along with in our enterprise only one man show...*

(B) *The business will touch peak in between you and me only...*

## About us

I got BE (Civil) from NIT Srinagar (J & K), worked in PWD, Rajasthan-India. Having 3 sons – Elder Ashok was in Kuwait then Singapore younger Sanjay was in Military of USA in Afghanistan and younger most Yokel is collegiate and National level Footballer.

I called back my sons to India and do some more here and give service to our country. They established this enterprise in 2014. I am thank full to my Sons that they understand my thoughts and they are keeping up. After all I also leave my Government job under Voluntary Retirement System and I planned lot of buildings so far and now my name changed as "Building planner" and now a day's absolutely hand out in this enterprise.

Now we are also export our products to UAE particularly in Dubai and Muscat some experts came and appreciate our products.

We are dealing basically in Granite of all sizes, well polished slabs. Fast Delivery, 24X7 Supports, Reasonable Rate. We are well equipped with good quality Machineries .As well as we have Engineers team. Now we also deal in Granite Door Window frames, Designing Stair cases and Interior Exterior Architectural works.

# TERM AND CONDITIONS

**1.** Photos are intended for reference only. Natural stone vary between slabs and we recommend you see the actual stone that will be used to fabricate. The beauty of natural stone comes from the true natural qualities of the stone itself. A stone can vary in color, shades, texture and composition. Mineral streaks may be visible where a part of the stone absorbs more minerals in one area than another. Grain and texture can vary. These characteristics must be taken into account when selecting the stone. Remember a small sample may not totally represent the true characteristics of the actual slab.

**2.** We make every effort to keep update our current price list on website. From time to time our stone Block suppliers may drop a stone or change a price without notice. Our enterprise guarantees price quotes for 30 days. We cannot guarantee stone availability on non- reserved slabs. Actual slabs located at our sources or in our warehouse can be held for two weeks.

**3.** For extra thickness or any extra order will considered a special order and cannot be cancelled once the stone is in our facility or in production and 30% of cost deposit is required to obtain your actual stone slab prior to template day. Balance is due upon installation. We accept major credit cards, personal checks and cash.
